

The figure consists of 12 vertical grayscale photographs arranged in a single row. Each photograph shows a person's head and neck from the side, with a white cervical collar around the neck. The images are numbered 1 through 12 from left to right. The sequence illustrates the range of motion for the head and neck, from a neutral position to extreme flexion and extension, as well as lateral bending. The person's face is partially visible, and the background is dark.
